

RECOMMENDATIONS FOR CITRIX ALLPLAN 2022

ADDITIONAL INFORMATION

Information can be found on the Citrix website:
support.citrix.com

HARDWARE REQUIREMENTS

MINIMUM SERVER SETUP FOR UP TO 5 ALLPLAN USERS

- > Intel Xeon processor or compatible
- > 48 GB RAM

RECOMMENDED SERVER SETUP FOR UP TO 5 ALLPLAN USERS

- > 2 x Intel Xeon processor with at least 2 GHz each
- > 64 GB RAM
- > Server graphics card for vGPU Usage (e.g. NVIDIA Grid) with at least 2 GB per user

RECOMMENDED SERVER SETUP FOR MORE THAN 5 ALLPLAN USERS

- > You need a separate server for every five Allplan users. Make sure that each server meets the requirements stated above

SOFTWARE REQUIREMENTS

- > Citrix Virtual Desktops Standard 7 2109 with Citrix Receiver Version Citrix Workspace app 2112.1 for Windows
- > Windows 10 Pro 64-bits 21H2 for virtual desktop
- > WIBU license server on a separate server

NOTES/RESTRICTIONS

- > The Allplan performance under Citrix depends on the network performance and can be somewhat slower compared to local installations
- > An external connection requires a high-performance setup: a latency of not more than 20 milliseconds; download bandwidth of at least 16 Mbit/s (recommended: 25 Mbit/s); upload at least 5 Mbit/s
- > You are advised to set the size of the cross-hairs to off (cursor only) in the Allplan options
